

## Quotients Sudoku

Place a digit from 1 to 9 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the nine outlined 3x3 regions.

A number between two cells indicates the quotient of the numbers in these cells. A number between four cells indicates the quotient between two diagonally adjacent cells, either top left + right bottom (\) or top right + bottom left (/).

(Solution)

|   |               |               |               |               |               |               |                           |               |
|---|---------------|---------------|---------------|---------------|---------------|---------------|---------------------------|---------------|
| 2 |               |               |               |               |               |               |                           |               |
| 3 |               |               |               |               |               | 1             | $\frac{1}{3}$             |               |
|   |               | $\frac{5}{8}$ |               | $\frac{2}{3}$ |               |               |                           | $\frac{4}{7}$ |
|   |               |               |               | $\frac{1}{2}$ |               | $\frac{2}{4}$ |                           | 6             |
|   | $\frac{2}{4}$ |               |               |               | $\frac{3}{7}$ |               | $\frac{5}{7}$             |               |
|   |               |               |               | $\frac{7}{8}$ |               |               |                           |               |
|   | $\frac{5}{7}$ |               |               |               |               |               |                           |               |
|   |               |               | $\frac{1}{8}$ | $\frac{1}{5}$ |               |               | $\frac{3}{7}$             |               |
|   |               |               | $\frac{1}{6}$ |               |               | $\frac{2}{7}$ |                           |               |
|   |               |               | $\frac{1}{3}$ |               |               |               | $\frac{4}{7}-\frac{2}{4}$ |               |
|   |               |               | $\frac{3}{5}$ |               |               |               |                           |               |
